- Back-End Frameworks : Hibernate, Spring, Spring Boot, JDBC
- Database : SQL Server, MySQL
- AWS Cloud : Technology-EC2,Security,AWS S3
- Version Control : Git and GitHub
- IDE’s & Tools : Eclipse, STS, VS Code, Postman, Lombok, Maven

Projects Works During Training

- **Basic Front End User Interface (React.js)**
 - Designed a basic User Interface using React.js to perform CRUD operations. We created different Components using React.js to Creating, Retrieving, Updating and Deleting operations. Since it is a simple Front End UI we used JSON to store the data.
- **My Portfolio**
 - Crafted a dynamic and visually appealing personal portfolio website using HTML, CSS, JavaScript, and Bootstrap. The site showcases my skills, projects, and professional journey. Implemented a responsive design for seamless viewing across devices, with a clean and modern aesthetic. The use of Bootstrap components enhances user experience and accessibility. This project reflects my proficiency in web development and design.
- **Basic Merchant-Product App(Spring Boot Application)**
 - Designed a Basic Spring Boot Application where we created Simple User Interface For Register, Login, Update, Delete the Merchants and also the Products using React.js.
 - Created different API's for Saving, Updating, Deleting, Verifying and Searching the Merchants and Products using Spring Boot.
 - Used MYSQL to Create Database for our Project to store the details in the backend. We also used POSTMAN API Testing tool to test our API's.
